

## 2016 Whitebark Pine Ecosystem Foundation Annual Science & Management Workshop

**\* Join us September 16-18 in Whitefish, MT \***

This year's workshop, *Successes and Challenges in Managing the Jewel in the Crown of the Continent*, will focus on conservation, ecology, and management ecology of whitebark pine in the Crown Ecosystem. This workshop includes scientific presentations, networking events, optional field tours, and a silent auction.

**Target Audience:** Managers, researchers, and others interested in whitebark pine management and conservation

### Event Location and Agenda:

- September 16** Science presentations from 8-5 are followed by social time, silent auction, and community program at the O'Shaughnessy Center.
- September 17** Field trip 9-3 at the Whitefish Mt Resort for a tree climbing/cone caging demonstration and to learn about whitebark pine friendly resort certification.
- September 18** Field trip 8-4 in Glacier National Park to plant limber pine seedlings and visit plus trees.

**Note:** Attendees from the Crown of the Continent area may also be interested in attending the Sept 15 inaugural meeting of the Crown of the Continent Five Needle Pine Working group. For more information, contact Regan Nelson [regan@crownconservation.net](mailto:regan@crownconservation.net)
