

BE **READY** for the **unexpected**

We need to hear your "micro" stories of fire experiences--those instances where you saw fire behavior that was surprising or unexpected and your observations about that experience. Any wildland firefighter can share; we want both current and past wildland firefighters to contribute. *As many stories as you want.* Just a couple of sentences or bullet points for a story. Anonymous. 5 minutes.

"I never saw fire do that before"

Please tell firefighters about our project so they can share their stories too. We need all of the stories we can get, from all geographic regions, stories from the past as well as recent stories. We want stories from firefighters with decades of experiences to those in their first year of fighting fires.

we need **YOUR STORIES** to learn more about unpredictable wildfire behavior. **5 minutes.** go to www.dri.edu/firestories or download the SenseMaker[®] app for iOS or Droid and use activity code EFB_IOS.

"We have seen fire behavior we've never seen down here, and it's really aggressive."

–fire chief, New Mexico
